

## ***Sustainable Financing for Women and Girls***

Investing in women and girls creates a ripple effect that yields multiple benefits, not only for the individuals being invested in but also for their families and communities. Cross-sector development collaboration can help reach the most vulnerable, promoting truly sustainable development that leaves no one behind. If stakeholders from both public and private sectors invest wisely in gender equality while leveraging the strengths of key players across all sectors, women and girls will benefit from better health, higher education, and economic growth.
